

SUPER

SUPER is designed for use in:

Pressure Washers and Spray Wash Booths
Engine & Drivetrain Soak Tank
Machinery or vehicle chassis cleaning operations
Hand held sprayers or trigger spray bottles
Mop buckets

FBWO SUPER is a heavy duty degreaser, the detergent that works when extremely difficult cleaning operations arise. It was designed to outperform traditional butyl detergent formulas that have been the standard of the industry for over fifty-years. Where other products fail this is the *GO TO* choice for hard surface cleaning requirements. Extremely effective in hand cleaning operations associated with machine rebuilding operations. Build-up and embedded soils are no match. Layers and years of hardened grease, oil, dirt and lubricant on equipment and vehicles are easily eliminated with **FBWO SUPER**.

FBWO SUPER is designed to remove:

- Accumulated grease and dirt on diesel engines and associated drive train
- Compacted or embedded dirt, oil, and grease on vehicle chassis
- Hydraulic oils and lubricant residues built up on equipment
- Embedded dirt residue on industrial equipment from excavating or construction operations

Normal mixture rate with either hot or cold water

DIRT LOAD	PRESSURE WASHERS	SOAK TANK	MOP BUCKET
Light	1-2 oz. / gallon	2-4 oz. / gallon	2-4 oz. / gallon
Medium	2-3 oz. / gallon	4-6 oz. / gallon	4-6 oz. / gallon
Heavy	4-8 oz. / gallon	8-12 oz. / gallon	8-12 oz. / gallon
